Materials Room - Quick Start

A one-page guide to how the Study Materials Room works.

For students

1. Open the app and go to History - Materials (the amber tab).
2. Click 'Download' to save the file, or 'Open Link' to visit
   the external page (Google Drive, Baidu, Dropbox, Notion, etc.).
3. Each card shows the file type (PDF / DOC / XLS / AUDIO / ...)
   so you know what to expect before clicking.

For admins

1. Enter the admin password (TOEFL Prep tab) to unlock edit mode.
2. Go to History - Materials. You will see a '+ Add Material' button.
3. Fill in: title, description, download URL, button label,
   category (Reading / Listening / Writing / Speaking / General),
   display order, and visible/hidden toggle.
4. Use the pencil icon on any card to edit, or the trash icon to delete.
5. Hidden items stay in the admin list (dashed card) but are not
   visible to students.

Tips

- You do NOT need to upload files to this server.
  Just paste the public share link (Google Drive / Baidu share URL).
- Keep download URLs public (anyone with the link can view).
- Use the order number to pin important material to the top.
